WHAT I BUILD

- Full-Stack Web Applications
- Backend Systems & REST APIs
- Business Websites & Platforms
- Booking & Registration Systems
- Learning Management Systems
- Event & Ticketing Platforms
- Database-Driven Applications
- Authentication & Role Systems
- Business Automation Solutions

ABOUT ME

I build practical web applications and digital systems that solve real business and organizational problems.

1+ year of hands-on development experience working across frontend, backend, databases, authentication, APIs, web security and deployment.

CORE TECHNOLOGIES

BACKEND

Python • Django • Node.js • REST APIs

FRONTEND

React • JavaScript • HTML • CSS • Bootstrap

DATABASES

MySQL • PostgreSQL • SQLite • Firebase/Firestore

TOOLS & OTHER TECHNOLOGIES

Git • GitHub • Web Security • Cloudinary • Vercel • Netlify

“

Building practical software.
Solving real problems.

EMMANUEL CHUKWEMEKA

PORTFOLIO & EXPERIENCE

MY APPROACH

I don't just build interfaces. I focus on understanding what the system needs to do, how data flows, who should have access to what, and how parts work together seamlessly.

WEB SECURITY

- Authentication & Authorization
- Role-Based Access Control (RBAC)
- Secure Data Handling
- Input Validation
- API & Database Security
- User Information Protection

FEATURED PROJECTS

01 — UDUF Africa LMS

Full-Stack Developer

Learning Management System

Complete online learning platform with user authentication, course access workflows, content structure, and instant certification upon completion.

Python Django React REST API PostgreSQL
